YOUR RATE PLAN IS CHANGING. MAKE YOUR CHOICE BEFORE MARCH 25.

Dear Customer Name,

The state of California is committed to using more clean, renewable power to help reduce carbon emissions and protect the environment. Time-Of-Use (TOU) plans encourage people to use energy at the times of day when renewable energy, like solar and wind, is the most abundant and at the lowest cost. With small changes in your energy habits, you can save money and help our state meet its clean energy goals.

In April 2022, you will be transitioned to a TOU rate plan, unless you take action to stay on your current Tiered rate plan. CARE or FERA program discounts will carry over to a TOU rate plan.

The Benefits of TOU and How It Works

- Take advantage of lower electricity prices in the morning, afternoon, and late at night.
- The less energy you use between the peak hours of 4 p.m. - 9 p.m., the more you'll save.

You're Auto-Enrolled in Bill Protection

If you pay more on a TOU rate plan for the first 12 months than you would have paid on your previous Tiered rate plan, you will receive a one-time bill credit for the difference after the first 12 months. You may switch rate plans twice in the 12-month period following the transition. All rate plans include energy generation and delivery. Santa Barbara Clean Energy generates your electricity and SCE delivers it.

How Will My Bill Be Affected and What Are My Options?

Here's an estimated cost comparison of your rate plan options based on your energy use from October 2020 - September 2021. If you experienced a change in usage, please visit sce.com/rateplantool for the latest information.

Your Current Plan	TOU-D-4-9PM Plan	Option 1: Take No Action to Automatically Transition to Your TOU Rate Plan	Option 2: Take Action to Stay on Your Current Rate Plan
\$XXX per year	\$XXX per year	1. Online: Fill out the form on sce.com/touttransition 2. Mail: Complete the attached reply form and return to SCE 3. Phone: Call us at 1-877-287-2140	

Other Rate Options: TOU-D-5-8PM – Your estimated cost is \$XXX per year with peak hours and higher pricing from 5 p.m. - 8 p.m.

TOU-D-PRIME may be a better rate plan for you if you have one of the following: an electric or plug-in hybrid vehicle, energy/battery storage system, or electric heat pump for space or water heating. For more information about TOU-D-PRIME or other rate plan options, visit sce.com/touttransition.

Sincerely,

Katie Sloan

Santa Barbara Clean Energy

©2022 Southern California Edison. Rate change requests must be received by March 25, 2022 to avoid the new rate transition. SCE will collect no additional money as a result of the TOU residential rate plans. If you are a Net Energy Meter (NEM) customer, your estimate was based on net usage. Changes to the amount of your usage will affect these estimates, so your actual costs may vary. Your estimate is based on SCE generation rates as a proxy, your actual costs may vary. If you would like to find out if you are eligible for any of our programs such as CARE/FERA, Medical Baseline, in-person visits before disconnection, or third-party notifications, please visit sce.com. Terms and conditions apply.

To stay on your current Tiered rate plan, please sign and return this form.
We must receive your form before March 25, 2022 to stay on your current rate plan.
If we receive this form after the deadline, it will be processed as a rate change back to your Tiered rate plan.
